2) Notice	t(s) The of References Cited (PTO-892) The of Draftsperson's Patent Drawing Review (PTO-948) The of Draftsperson's Patent Drawing Review (PTO-948) The of Draftsperson's Patent (s) (PTO-1449 or PTO/SB/05) The of No(s)/Mail Date 7/15/03.	4) Interview Summary Paper No(s)/Mail D  5) Notice of Informal F  6) Other:				

1. This office acknowledges receipt of the following items from the Applicant:

Information Disclosure Statement (IDS) was considered.

Papers submitted under 35 U.S.C. 119(a)-(d) have been placed of record in the file.

2. Claims 1-10 are presented for examination.

## Election/Restriction

3. Claims 11-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention/species, there being no allowable generic or linking claim. Election was made without traverse dated on October 14, 2004.

# Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1, 7, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ninomiya U. S. Patent No. 5617359.

Figure 6 of Ninomiya is directed to a nonvolatile semiconductor memory comprising: a nonvolatile memory cell (fig. 3) for storing a charge in response to data; and a memory cell driving portion for driving the memory cell; wherein the memory cell driving portion executes a first decision process of deciding pass/fail of the data that is read from the memory cell under a first deciding condition (PHASE 1) and then applying a signal (ST11) to the memory cell that is decided as fail to change an amount of charge stored in the memory cell, and a second decision

Page 3

(PHASE 2) process of deciding the pass/fail of the data that is read (ST17) from the memory cell under a second deciding condition that is relaxed rather than the first deciding condition.

6. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Shin U. S. Patent No. 6076138.

Figure 5 of Shin is directed to a nonvolatile semiconductor memory operating method of executing data writing or data erasing in a nonvolatile memory cell (fig. 4B) while verifying a data of the nonvolatile memory cell, comprising: a first decision process of reading (205) the data from the memory cell under a first deciding condition to decide pass/fail, and applying a signal (203) to the memory cell to change an amount of charge stored in the memory cell if the data is decided as fail; and a second decision (210) process of reading the data from the memory cell under a second deciding condition, which is relaxed rather than the first deciding condition, to decide the pass/fail (216); wherein processes are repeated from the first decision process when the data is decided as fail in the second decision process.

### Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shin U.S. Patent (USP) No. 6076138 in view of Satoh et al. U.S. Patent No. 6493265.

Application/Control Number: 10/618,712

Art Unit: 2818

Shin discloses all the subject matter claimed except for silence wherein the memory cell is a memory cell that corresponds to multiple levels, and the first deciding condition and the second deciding condition are set individually every level. However, Figures 12, 20A-20C of Satoh disclose wherein the memory cell is a memory cell that corresponds to multiple levels (00, 01, 10 and 11), and the first deciding condition and the second deciding condition are set individually every level (fig. 20B). It would have been obvious to a person of ordinary skill in the art at the time invention was made to modify Shin's nonvolatile memory which utilizes the multiple levels as taught by Satoh in order to have a number of different read-out potentials for determining the multi-bit data (abstract).

9. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. Seki et al. (USP 6438036), Matsubara et al. (USP 5844843) and Anami (USP 5784318) disclose a nonvolatile memory device.

#### Allowable Subject matter

- 10. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 11. The following is a statement of reasons for the indication of allowable subject matter:

Claims 2-6 include allowable subject matter since the prior art made of record and considered pertinent to the applicant's disclosure, taken individually or in combination, does not teach or suggest the claimed invention having a reference voltage or current in the first decision process is different from a reference voltage or current employed in the second decision process.

Application/Control Number: 10/618,712

Art Unit: 2818

12. When responding to the office action, Applicants are advised to provide the examiner

with the line numbers and page numbers in the application and/or references cited to assist the

Page 5

examiner to locate the appropriate paragraphs.

13. A shortened statutory period for response to this action is set to expire 3 (three) months

and 0 (zero) day from the date of this letter. Failure to respond within the period for response

will cause the application to become abandoned (see MPEP 710.02 (b)).

14. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Hoai V. Ho whose telephone number is (571) 272-1777. The

examiner can normally be reached on 7:00 AM -- 5:30 PM from Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David Nelms can be reached on (571) 272-1787. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
